COURSE CONTENT

This comprehensive program is designed to equip IT and cybersecurity staff with essential knowledge and skills to understand the cybersecurity mission and address common cybersecurity challenges. It aims to simplify complex cybersecurity discussions and provide clarity on key concepts. This program serves as an advanced level of Radea for technical staff, offering in-depth coverage of crucial cybersecurity areas. Radea Plus course offers a deep understanding of the following:

- Cybersecurity Fundamentals
- User and Endpoint Security
- Network and Infrastructure Security
- Cloud and Physical Security
- Application Security
- Incident Response and Risk Management
- Advanced Security Practices

Participants will engage in cybersecurity simulations and vulnerability assessments to identify potential threats and weaknesses, enhancing their ability to safeguard their digital environments effectively
